## MOM'S MAGIC

**M**om is the world. Recent surveys reveal that it's a must to nurture a healthy environment at home and family as well to ensure the proper development of an individual. And we all know mom has the right key in her hand to do that. In fact she plays the key role to create a blissful atmosphere at home. Our Children grow up there properly and developed as an individual to face the future challenge in the world.

We live life with enormous complaint and discontent in our mind. We blame the people, society, family, government, bureaucracy, media, and sometimes even God on our ill fate or misfortune.

But nobody perhaps would complain against mom except for Hamlet, the prince of Denmark. We all know this Shakespearian tragedy wherein the mother of Hamlet is portrayed as the antagonist. This lady killed Hamlet's father and eventually married his brother. But that's about drama, in real life we all respect and admire motherhood. Mom holds such an appearance.

10, May was the International Mother Day. The message of the day is to honor and celebrate motherhood and maternal bond. In United States and Canada Mother's Day is celebrated on the second Sunday of May while in Mexico it is observed on 10, May.

The role of a mother is much more essential in the Indian society. With the mom in the centre place, everything seems to work well here. Everything around us gets gloomy when mother is sad. When mom laughs, everything in the family get the spark.

Mom has such a magic spell.
